

### **IEA Task 33 meeting hosted by ITC**

KIT Campus North hosted the IEA Bioenergy Task 33: Gasification of Biomass and Waste by invitation of ITC from June 11 – 13, 2024. During the Task Meeting the members from 12 countries discussed the actual status of different gasification projects, e.g. regarding hydrogen utilization, syngas cleaning or economical issues. The international workshop on “Gasification for production of biochemicals” focused on process chains using synthesis gas from biomass gasification for production of chemicals like ethanol, methanol or olefins.
